Professional Summary

AI Full Stack Developer with 2.5+ years of experience building production multi-tenant SaaS and LLM-powered products, including RAG chatbots, OCR pipelines, and AI code analysis. Experienced with Python, Django, FastAPI, React/Next.js, PostgreSQL, and AWS. Owns features end to end, from client requirements and architecture through deployment and production support.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3
Backend and Architecture: Django, Django REST Framework, FastAPI, REST APIs, Microservices, Event-Driven Architecture, Multi-Tenant SaaS, JWT, OAuth, RBAC, Rate Limiting
AI / GenAI: OpenAI API, LLM Integration, LangChain, LangGraph, RAG, pgvector, Semantic Search, Prompt Engineering, AI Chatbots, OCR
Databases and Queues: PostgreSQL, Redis, Oracle SQL, Query Optimization, Queue-Based Asynchronous Processing
Cloud and DevOps: AWS (EC2, RDS, S3, ALB, CloudFront, Route 53), Docker, CI/CD (GitHub Actions), Linux, Blue-Green Deployment, Hetzner Cloud
Tools and Testing: Git, GitHub, Postman, Cursor, GitHub Copilot, Unit Testing, API Testing

Professional Experience

Full Stack Developer | Seravion Technologies LLP *Aug 2025 – Present*
Bengaluru

- Lead end-to-end development of Accounting and CRM modules for a multi-tenant ERP SaaS platform, covering requirements, architecture, database design, frontend, backend, QA, deployment, and production support.
- Ship AI-powered features, including a RAG-based internal knowledge chatbot backed by pgvector semantic search and AI automation workflows using OpenAI, LangChain, and FastAPI.
- Build full-stack features using Python, Django, FastAPI, React.js, Next.js, TypeScript, PostgreSQL, and REST APIs for CRM, accounting, invoicing, billing, and customer management workflows.
- Deploy production services on AWS EC2 using Docker with load balancer configuration; maintain a dedicated QA environment on Hetzner Cloud.
- Reduced deployment downtime to near-zero using Blue-Green releases; troubleshoot production, API, database, and infrastructure issues in real time.
- Work directly with clients and stakeholders to translate business requirements into scalable technical solutions; collaborate with frontend, backend, AI, QA, and DevOps teams.

Python Developer | Daski Career Management LLP *Sep 2024 – Aug 2025*
Bengaluru

- Built Carevo, a career recommendation platform, using Python, Django REST Framework, React.js, PostgreSQL, and REST APIs; engineered APIs for student profiles, career data, college information, and partner-agency workflows.
- Created React.js interfaces for student onboarding, profile management, career exploration, and recommendation workflows, consuming backend REST APIs.
- Established automated web scraping and data processing pipelines covering 500+ career paths and 2,000+ colleges (courses, fees, cutoffs, quotas) with data validation and transformation.
- Contributed to a multi-factor career recommendation algorithm that maps student profiles to suitable career paths and generates suitability scores.
- Designed and optimized PostgreSQL schemas, queries, and data workflows for large-scale career and education datasets.

Backend Developer | CodeRagon Infotech *Feb 2024 – Aug 2024*
Surat

- Delivered and maintained scalable RESTful APIs using Python and Django REST Framework for SaaS and client-facing web applications.
- Implemented JWT-based authentication, authorization, and Role-Based Access Control (RBAC) for secure multi-user workflows.
- Designed PostgreSQL schemas and data models, and connected third-party APIs to automate business workflows and extend application functionality.

Projects

GitHub Auto Reviewer – AI-Powered Code Review SaaS for GitHub Pull Requests

- Built an AI-powered full-stack SaaS for automated pull request inspection and code quality analysis, detecting security vulnerabilities, performance issues, logic risks, test gaps, and maintainability concerns.
- Set up GitHub OAuth, GitHub App installation, and webhook-based workflows for real-time PR analysis, structured summaries, and inline code comments.
- Engineered backend services in Python and Django with PostgreSQL, Redis, and queue-based asynchronous processing for scalable PR processing and secure backend-only LLM integration.
- Delivered Next.js, React.js, and TypeScript dashboards for review results, analytics, policy-driven configuration, and admin controls.
- Designed multi-tenant SaaS architecture with RBAC, credit-based usage tracking, billing workflows, and production-ready deployment.

AI OCR and Organization Management System | Shramjivi Sanghatana

- Built a full-stack organization management platform using Python, FastAPI, React.js, PostgreSQL, Docker, and AWS, supporting 5,000+ daily users.
- Implemented React.js frontend components and connected REST APIs for OCR processing, data management, and organization workflows.
- Created an AI-powered OCR pipeline with open-source models to extract structured data from handwritten Marathi receipts, improving accuracy by 20%+.
- Implemented rate limiting and throttling for high-volume AI requests and added Firebase event-driven notifications for real-time updates.
- Deployed production services using Docker and AWS EC2, RDS, ALB, S3, and CloudFront.

Education

M.Sc. Data Science & AI – BITS Pilani Digital 2026 – 2028 (Expected)

Bachelor of Computer Applications (BCA) – Veer Narmad South Gujarat University Oct 2021 – Apr 2024
CGPA: 8.5/10

Certifications

- LangChain for LLM Application Development – DeepLearning.AI
- Python Full Stack Development – PySpiders, Bangalore
- SQL (Advanced) – HackerRank Certificate
- AWS Solutions Architecture Job Simulation – Forage Certificate
